Summary

Aspiring software engineer with a strong foundation in front-end development and hands-on experience in projects like student management systems, car parking apps, and placement schedulers. Seeking to leverage my skills in C, JavaScript, React.js, and Google Analytics to contribute to innovative projects in a dynamic and growth-oriented environment.

Skills

Languages: C, C++, HTML, CSS, JavaScript, SQL, Python
Frameworks: React.js
Animation: Three.js
Video Editing: Capcut, After Effects
Designing: Canva
Databases: MongoDB, SQL, Firebase
Tools: Power BI, Tableau

Education

Pillai College of Engineering, Panvel, Bachelor of Engineering in Computer Science — Aug 2025

Certifications:

- Web Development - Great Learning
- Cloud Computing - Great Learning
- Front-End Development - Great Learning

Projects

Placement Preparation Website (Front-End) — Mar 2024

- Collaborated in a team to develop the front-end of a website aimed at helping students secure placements.
- Created user interfaces for interview preparation resources, including mock questions, tutorials, and tests.
- Built a company calendar feature to display recruitment timelines and job deadlines.
- Developed for a hackathon with 2 team members; provided resource materials and placement scheduler.

Car Parking App — Feb 2023 – Apr 2023

- Developed a mobile/web app that shows nearby parking spaces.
- Responsible for implementing API fetching functionality.

TGMS System — Aug 2023 – Nov 2023

- Created the front end for a student management system where professors are assigned to students as mentors.
- UI designed to track and manage students' progress until graduation.

Achievements

- Participated in a hackathon, collaborated in a team to develop a front-end website to help students secure placements.
